

Academic Support/Enrichment

using technology

Smart Tutor

The software program, SmartTutor.com offers fun online Reading and Math lessons that works great in a homeschool, after school or summer environment. It's also perfect for busy parents who would like to give their child extra reading and math activities. Since our software program automatically creates a program that is targeted to your child's skills you won't have to spend hours searching for activities online. SmartTutor.com initially tests your child and then automatically determines their learning strengths and weaknesses. It then works with them to ensure academic success by creating a customized lesson plan designed especially for them.

Time4Writing

Would your young writers benefit from working one-on-one with a writing teacher? An online writing courses that helps elementary - high school students build writing skills through one-on-one interaction with a certified teacher. For eight weeks, students study a new topic each week through interactive exercises, lessons, readings, and written assignments. A personal writing teacher reviews and provides feedback on each assignment the day after it is submitted. Grade 2 – High School

Webmath

Webmath is a math-help web site that generates answers to specific math questions and problems, as entered by a user, at any particular moment. The math answers are generated and displayed real-time, at the moment a web user types in their math problem and clicks "solve." In addition to the answers, Webmath also shows the student how to arrive at the answer. Kindergarten-high school.

Omega Math

Our math classes are the most effective classes in today's market. Each lesson has been tested by the students for over fifteen (15) years. Many topics in math are too deep for students to fully understand the first time around. They need to have topics demonstrated several times, but because of curriculum time constraints this is not possible in the classroom. Every lesson includes many examples with the English explanation that goes along with each problem. The lessons start out with the easiest examples and then move to the more advanced problems. Even though there are thousands of students using the online curriculum, Omega Math gets very few questions. As of today, thousands of adults and youths have benefited from the online courses and have been able to advance in school and move toward their goals.

Middle School and High School Math
